

CASE STUDY

CASE STUDY

Application Sector: Healthcare

Client: York Teaching Hospital NHS Foundation Trust

York Teaching Hospital NHS Foundation Trust provides a comprehensive range of acute Hospital and specialist healthcare services for approximately 800,000 people living in and around York and North Yorkshire - an area covering 3,400 square miles. The eight Hospital sites have an inpatient capacity of 1,100 beds and have a workforce of over 8,500 staff working across their Hospitals.

With the implementation of CBCs' video management system- Control, the Trust is able to combine their CCTV infrastructure in a secure platform enabling robust effective use of CCTV in line with their systems stated purpose -Crime detection and Public Safety. The VMS is proving a key attribute for live incident management as well as giving seamless instant replay with multiple server connections to over 140 IP cameras. Control replay sequencing option has also proven to cut down physical man hours spend reviewing footage; with effective results.

CBC has been a technology partner to the NHS for the past 6 years and continues to work with the trust, providing cutting edge solutions with a view to maximise efficiencies.
